TARGETS SET AMBITION AND AMBITION MOTIVATES ACTION
WHAT GETS MEASURED GETS MANAGED

#CHAMPIONS123
ACTION ULTIMATELY MATTERS
IS THE WORLD ON TRACK TO ACHIEVE TARGET 12.3 BY 2030?

Road Map to Achieving SDG Target 12.3

- 2016-2018: 5% reduction in FLW achieved globally
- 2019-2021: 10% reduction in FLW achieved globally
- 2022-2024: 20% reduction in FLW achieved globally
- 2025-2027: 30% reduction in FLW achieved globally
- 2028-2030: 50% reduction in FLW achieved globally

#CHAMPIONS123
ASSESSING PROGRESS

Green
There is sufficient progress to suggest that the sector is on track to meet or exceed the milestone within the time period.

Yellow
There is some progress toward meeting the milestone, but it is below the pace needed to meet the milestone within the time period.

Red
There is little progress toward meeting the milestone, or previous progress is backsliding.

#CHAMPIONS123
Countries or regional blocs that have set reduction targets aligned with SDG Target 12.3 cover an estimated **28 percent** of the world’s population.

Nearly **60 percent** of the world’s 50 largest food companies participate in programs that have a food loss and waste reduction target.

#CHAMPIONS123
Only a few countries currently measure and report on food loss and waste. But these countries add up to just 7 percent of the world’s population.

Only a few of the world’s largest food companies are measuring and publicly reporting on food loss and waste within their operations.
ACTION

There has been a burgeoning of initiatives but these efforts do not approach covering 20 percent of the world’s population by 2018, the first milestone.

More than 10 percent of the world’s 50 largest food companies now have active food loss and waste reduction programs.
